Growing businesses choose ERP over point solutions or stand-alone accounting solutions for several reasons:

- **48%** More likely to be able to forecast and plan for demand.
- **11%** Reduction in operational costs.
- **63%** More likely to be able to standardize business processes, methods, and sloppy data.
- **11%** Increase in operational costs.

### Challenges for growing businesses without a single system

- **83%** Systems cannot track business processes.
- **83%** Systems cannot interact with one another.
- **78%** Inability to access data when away from the office.
- **72%** Redundant data.
- **66%** Inaccurate data.

### HOW USING A SINGLE SYSTEM HELPS A GROWING BUSINESS

A single system provides accurate, easy-to-find data that enables visibility, collaboration, and efficiency.

- **37%** More likely to be able to tailor and access reports in a self-service capacity.
- **29%** Decrease in the time it takes to make decisions.
- **24%** Can tailor ERP to support business change (compared to 19% of all others).
- **50%** Have business analytics integrated into ERP.
- **58%** Have automatic notifications (compared to 23% without).

### RESULTS

- **36%** DECREASE IN THE TIME IT TAKES TO MAKE DECISIONS

ERP is the advantage that businesses need in order to support growth, agility, and decision-making to get ahead of their competitors.
